

Courts Selected for HIP Work During 2020

The courts selected for HIP work in 2020 is listed in the table below. Since the proposed duration of the Homes Improvement Program is 5 years from 2016 to 2020, installation of new windows, doors, siding, baseboard heaters and optional improvements selected by members was scheduled for approximately 1/5th of frame and masonry homes during each year from 2016 to 2020. Selection of units for improvements each year followed the same procedure:

1. Courts were grouped into 3 categories – frame, block and brick units.
2. Courts in each category (frame, block and brick) were assigned a number using a random function in a Microsoft Excel spreadsheet. The first 1/5th of the courts in each category that obtained the lowest random numbers were selected for work in 2016.
3. A similar procedure was followed for each subsequent year of the HIP.

2020 is the final year for the Homes Improvement Program!
